

HEGL Christmas Activity

<https://www.flickr.com/photos/58704541@N00/4284895365/in/photostream/>

Join us on Monday, December 11, from 2.15 pm in the HEGL lab!

We want to

- build Origami polytopes out of Sonobe units,
- play boardgames,
- eat cookies,
- chat and have fun.

Decorated Sonobe unit

Finished Sonobe unit with foldings

Can't wait until then?

Get some sheets of square paper (9cm x 9cm) and build Sonobe units. You can find a manual attached or [here](#).

You can take any kind of paper (as long as it is 9cm x 9cm), coloured or plain, patterned or monochrome.

Two parts of the finished Sonobe unit on the side with pockets will be visible in the end (see the yellow unit above). If you want to, you can decorate it in a way you like.

Leave the units in the box in front of HEGL or bring them to the assembly party on December 11.
